via email and US post

Dear Mr. Munson,

I am writing to you to express my and my husband Douglas Sabetti's objection to Energy Fuels Inc.'s plans to open and operate the Calliham Mine and the Sage Mine, also known as the Sage Plain. Doug and I object to the project based on our proximity to both locations. Our property sits in between the Calliham Mine and Sage Mine. The proposed location of the Calliham Mine operation is less than a 1/8 mile to our door. Our main concern is our health. Uranium is toxic and causes cancer. Doug and I do not feel confident that we can be fully protected no matter what precautions Energy Fuels Resources assures us they will take.

We are also very concerned about our financial investment and the improvements we have made to our property. My husband and I worked very hard to purchase that land and plan to retire at that location. Not only would the mine be a severe impact on our quality of life, but our property will be worthless and our personal and financial investment would be gone.

As my husband and I discussed this situation further and started to investigate, we realized that not only is there a plan for the Calliham Mine, but also for the Sage Mine, together known as the Sage Plain. These two projects would impact us greatly. Our property would be subject to trucks, contaminated dust, lights, and noise. Our concern for our health and our investment is our objection and we will continue to object to this project through a variety of channels.

We are aware that Energy Fuels Resources has uranium properties all throughout the southwest that could be expanded or developed without such a severe impact to a nearby neighbor.

Sincerely,

Douglas Sabetti
